Fibromyalgia affects approximately 10 million Americans. Unfortunately, traditional management involves medical treatment which provides temporary symptomatic relief at its best, and leaves the sufferers in **daily, chronic pain.**

Fibromyalgia sufferers, get your *LIFE* back!

This workshop will provide you with:

- 1 - knowledge of the cause of Fibromyalgia
- 2 - research proving the dangers of drug therapy and how prolonged drug therapy causes other serious health issues
- 3 - A 5 part plan to address all aspects of this syndrome and restore health and vitality.
